Boul. De Maisonneuve Ouest, Montreal, Quebec

SOFTWARE DEVELOPER

Creative and detail-oriented developer with a strong focus on user experience, performance, and accessibility. Experienced in building modern, responsive websites and applications for clients across various industries. Adept at collaborating with designers, content teams, and stakeholders to deliver intuitive digital solutions.

KEY COMPETENCIES

TypeScript	MySQL/PostgreSQL	Docker
Python	Node.js	Github
PHP	Azure ADB2C	Jira
React	Tailwind CSS	Figma

PROFESSIONAL EXPERIENCE

Techo-Bloc **May 2025 - Present**
Frontend Developer

- Engineered responsive, WCAG-compliant pages from Figma mockups using pure HTML, CSS, and JS
- Built & maintained a modular UI component system to accelerate dev cycles and ensure design consistency
- Improved Core Web Vitals (notably CLS, LCP) through layout stabilization and asset optimization
- Diagnosed and resolved UI/UX bugs across staging and production builds
- Collaborated with engineering and design teams to build product calculators and improve conversion rates

CAPitalia & Clients **September 2024 - Present**
Freelance Full-Stack Developer

- Built performant, SEO-optimized sites using a modern stack and headless architecture (Next.js, Sanity)
- Engineered internal tools: member dashboards, voting systems, and attestation flows
- Scoped and managed projects end-to-end, from proposals to budget-conscious delivery
- Customized WordPress/WooCommerce themes using PHP and CSS for client-specific needs

MyWallet Mobile **June 2023 - August 2024**
Software Developer Intern

- Implemented full localization for mobile UI, handling region-specific formats and language display
 - Built a responsive React-based dashboard with virtualization and memoized rendering for real-time updates
 - Integrated Azure Entra ID (formerly ADB2C) for multi-user authentication and secure access control
 - Visualized live financial data using Recharts and Chart.js with performance-focused updates
 - Connected Azure SQL and IoT Hub to support secure data flow across services
-
